CAREER OBJECTIVE

Highly motivated professional with experience in developing and managing software applications. Proven record of successful design and implementation of software solutions to streamline processes and improve productivity. Highly skilled in modern technologies, adept at troubleshooting and debugging software applications to ensure optimal performance.

EXPERIENCE

FULL STACK SOFTWARE ENGINEER

IDEX Innovation, December 2020–June 2023

- Built custom React components to improve user experience across multiple browsers.
- Mentored junior developers in improving their skillset around modern web development technologies .
- Developed and maintained web applications using HTML, CSS, JavaScript, React.js and Node.js.
- Designed user interfaces that adhere to best practices for usability and accessibility.
- Debugged cross-browser compatibility issues in order to ensure optimal UI and UX performance.
- Built custom components leveraging React.js state management tools like Redux or MobX.
- Utilized version control systems such Git and GitHub for source code management throughout the entire project lifecycle .

FRONTEND ENGINEER

AssemblyHQ, August 2022–January 2023

- Built cross-browser compatible web application utilizing progressive enhancement techniques.
- Collaborated with designers to create user friendly interfaces for websites.
- Implemented responsive design principles to ensure mobile compatibility of websites.
- Communicated project status to primary stakeholders and project management personnel.
- Documented test plans, testing procedures, or test results.
- Implemented responsive design principles to enable optimal viewing experiences across different devices.wq

FRONTEND DEVELOPER, Lagos

Sendstack, April 2020–January 2021

- Conferred with management to prioritize needs, resolve conflicts, and develop content criteria.
- Applied best practices in coding standards, semantic markup, SEO optimization techniques.
- Documented test plans, testing procedures, or test results.

- Collaborated closely with the back-end developers to integrate API calls into the front-end codebase.
- Documented requirement specifications to formalize into features and user stories.
- Ensured accessibility compliance through testing, validating, and debugging web applications.
- Recommended and implemented performance improvements.
- Maintained understanding of current web technologies and programming practices through continuing education and participation in professional conferences and workshops.

SOFTWARE ENGINEER, NY

Andela, May 2019–September 2019

- I helped build an application that integrates and supports the needs of teams in the organization ensuring efficiency, and improving performance and productivity rate by more than 90%.
- Collaborated with stakeholders to implement the application that helped to achieve common understanding of the project delivery schedule from MVP to the Product-Market-Fit stage.
- Developed the style guide for the team design system with Storybook, which optimized our development workflow.
- Adapted the best development practices by adhering to common coding standards in a team of 6 developers that helped to decrease code complexity and improve maintainability of the shared libraries and components
- Constructed reusable UI components
- Boosted app performance by reducing http request by using memorization technique for caching responses.
- Performed architectural and code reviews with colleagues
- Improved code and unit testing by converting state React Hooks thereby improving test, cleaner, easier to read and maintainable code.

EDUCATION

BSC IN STATISTICS, Ilorin

University Of Ilorin, June 2017

SKILLS

Javascript

Typescript

React

Vue

Node

Ruby On Rails

Testing(Unit, BDD, TDD And End To End Testing)

React Native

State Management(Redux, Context API Or Mobx)

SQL

CERTIFICATIONS

- Full Stack Web Development Certification, Computer Software Engineering, FreeCodeCamp
